

CLAIMS

1. Transparent cosmetic and/or dermatological formulation comprising at least one antiperspirant active ingredient and/or deodorant active ingredient, at least one
5 α -hydroxycarboxylic acid and water.
2. Formulation according to Claim 1, characterized in that the hydroxy acid chosen is mandelic acid.
3. Formulation according to Claim 1 or 2, characterized in that the antiperspirant active ingredient is chosen from the group of aluminum salts, preferably
10 aluminum chlorohydrate or aluminum zirconium salts.
4. Formulation according to one of the preceding claims, characterized in that the ratio of AP active ingredient to α -hydroxycarboxylic acid is chosen in the range 15:1 to 1:1, preferably 12:1 to 2:1, in particular 10:1 to 2.5:1.
5. Formulation according to one of the preceding claims, characterized in that the
15 antiperspirant active ingredient is used in an amount of from 1 to 35% by weight, preferably from 1 to 25% by weight, particularly preferably from 1 to 20% by weight, based on the total mass of the formulation.
6. Formulation according to one of the preceding claims, characterized in that the
20 hydroxy acid, in particular mandelic acid, is used in an amount of from 0.1 to 10% by weight, preferably from 0.1 to 8% by weight, based on the total mass of the formulation.
7. Formulation according to one of the preceding claims, characterized in that the formulation has a defined yield point.
8. Use of a cosmetic formulation according to at least one of the preceding claims
25 for application to the human skin.
9. Use of a formulation according to at least one of the preceding claims for preparing a transparent deodorant and/or antiperspirant hydrogel.
